There are between one and three children in every class of thirty with Dyspraxia or Dyspraxic type tendencies. Many teachers are concerned by the recent dramatic increase in the numbers of children with these difficulties and feel unsure of how to manage them. This workshop explains what Dyspraxia is; its impact on the child and offers simple strategies to help support these children within the busy classroom.

Participants on this course will:

- Gain a good general understanding of Dyspraxia, the background physiology and the challenges this presents to children and young people affected by it.
- Be aware of recent research.
- Familiar with simple but effective strategies which teaching staff can apply within the busy mainstream classroom.
- Understand and manage handwriting difficulties associated with Dyspraxia.
- How to access further sources of information, useful resources and agencies offering support.

Cohort: SENCOs, INCOs, class teachers, support staff and anyone interested or working with a child/student with DCD.

Cost: £80 for all participants

This course will be held at the Access & Inclusion Centre,
Queen Elizabeth II Jubilee School, Kennet Road, W9 3LG
