Dyspraxia and it's co-occurrence with Dyslexia and Autistic Spectrum Disorder.

Research has highlighted that the majority of children with Specific Learning Difficulties also have dyspraxia (Kaplan et al 2006).

There are between one and three children in every class with this hidden difficulty and sadly many are not identified.

This practical, interactive workshop will equip any busy classroom teacher and Senco to identify dyspraxia, it's co-occurrence with other conditions and the simple but effective strategies recommended to support these children within school.

Cohort: SENCOs, INCOs, class teachers, support staff and anyone interested or working with a child/student with DCD.

Cost: £80 for all participants

This course will be held at the Access & Inclusion Centre,
Queen Elizabeth II Jubilee School, Kennet Road, W9 3LG
