### **Learning with iPads: A pathway towards independence**

#### **Outline**

Young people with vision impairments are now increasingly able and eager to learn to access resources independently in ways that were not previously possible. Tablets and the iPad in particular have opened a world of possibilities, facilitating access to the board, books and worksheets as well as music and science etc. while being quick to set up, easy to use and mainstream - includes video illustrations.

#### **Description**

How to use the iPad as an all-round tool to access the curriculum, especially in Primary schools (often in combination with a laptop in Secondary schools).

#### **Outcome**

Learning about useful apps and accessibility features with lots of practical examples and video illustrations.
